

As one of the brands in the Crane Building Products family, TimberTech shares their singular focus on delivering attractive and innovative solutions for the construction and building trades. We also benefit from over 60 years of custom extrusion experience.

TimberTech pioneered the patented process of combining the highest quality reclaimed wood fibers with pure plastic resins to create skid-resistant, splinter-free composite decking with superior strength and durability. The result is a more consistent, more natural-looking, high-quality deck material.
